PROFESSIONAL SUMMARY

Full-stack engineer with 6+ years of fully remote work who owns features end to end — **React frontends, Node.js backend services and APIs**, deployment and iteration. I make integrations easy for other developers: wrote the Firebase SDK documentation engineers onboarded from, designed a versioned gRPC contract that multiple external USSD providers integrated against, and led the zero-downtime migration of 20+ production applications to Firebase/GCP, reporting to the CTO. Shipped **measurable product outcomes**: Express Shipping (+$40 revenue per order) and a video-based 3D feature that increased buyer conversion. Now applying that to **developer experience** on an API platform. Code: github.com/zac-09.

CORE COMPETENCIES

Full-Stack Feature Ownership | React & Tailwind Frontend Delivery | Backend Services & APIs (Node.js, Express) | Developer Experience & Documentation | API Contract Design (gRPC, REST) | Measurable Product Outcomes | Cloud Deployment (GCP, Firebase) | Team Leadership

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer · US Remote · e-commerce

- Led the end-to-end migration of **20+ production applications** from Parse/MongoDB to Firebase/GCP with **zero downtime**, reporting directly to the CTO.
- Shipped **Express Shipping** end to end, generating an additional **$40 revenue per order**.
- Built a customer-facing **3D visualisation feature** using video overlay and ffmpeg, **increasing buyer conversion**.
- Implemented real-time two-way sync between MongoDB and Firestore using Node.js and Google Pub/Sub; migrated a Webflow website from a Parse backend to Firebase.
- Migrated file storage from Amazon S3 to Google Cloud Storage via a Python script; saved **$5,000/month** by moving all services off AWS.

MTailor

Mar 2022 – Jul 2022

Contractor · US Remote

- Wrote **developer documentation** for fellow engineers on the new Firebase SDKs (Node.js and Python); trained the Ops team on the Firebase dashboard and backup procedures.
- Built the migration script that read data from MongoDB, ran complex processing logic and wrote to Firestore.

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer · Singapore Remote · fintech PWA

- Added responsive **UI pages in React**, Tailwind and HTML to a PWA delivering real-time stock prices; extended **backend APIs in TypeScript** on Firebase Cloud Functions and Express.js.
- Led optimisation of the PWA's data layer: built ad-hoc jobs over **2M+ Firestore records** to keep prices current from Morningstar APIs.

Mind2matter

Jan 2022 – Jul 2022

Software Engineer · US Remote · agency

- Full-stack delivery for demanding clients, reporting to the CTO: **React UIs from Figma designs** under tight timelines and Node.js backends for DeFi applications using Web3.

CodeBits

Jan 2020 – Jul 2021

Software Engineer / Team Lead · Uganda Remote · legal tech

- Led a team of 4 developers building complete production systems for NGOs: a case management system (FIDA Uganda) and a paralegal database (LASPNET Uganda).
- Built a USSD service for legal aid providers communicating with a Node.js backend via **gRPC**; architected a microservices backend on Apache Kafka, Docker and Kubernetes.
- Developed a cross-platform mobile app in React Native and Expo (iOS & Android) with Firebase push notifications.

PROJECTS

Agentic Evaluation Pipeline developer tool

Extended an open-source agentic pipeline on Claude Code that scans job portals, verifies each source live in a headless browser before any model scoring, deduplicates inputs and generates tailored documents — a developer tool used daily, 200+ evaluations run.

Claude Code · Playwright · Node.js · YAML

Healthcare WhatsApp Assistant API integration

Conversational assistant that reads prescription photos and replies inside WhatsApp, integrating three third-party APIs: OpenAI for dialogue, Google Vision for OCR, and the WhatsApp Business API.

OpenAI API · Google Cloud Vision · WhatsApp Business API · Node.js

EDUCATION

B.Sc. Computer Engineering — Makerere University 2018 – 2022

Kampala, Uganda

SKILLS

Languages: JavaScript, TypeScript, Python, HTML, CSS, Go (intermediate), Rust (intermediate)

Frontend: React, Tailwind, PWA, React Native (intermediate)

Backend: Node.js, Express.js, REST APIs, gRPC, Microservices, Firebase Cloud Functions

AI: OpenAI API, Google Cloud Vision, Claude Code agentic workflows

Async & Data: Google Pub/Sub, Apache Kafka, NATS Streaming, MongoDB, Firestore

Cloud / Infra: GCP, Firebase, Google Cloud Storage, AWS (intermediate), Docker, Kubernetes, Linux, Git **Media:** ffmpeg (video overlay)

Spoken: English, Kiswahili
