PROFESSIONAL SUMMARY

Polyglot full-stack / backend engineer with 4+ years shipping production web systems at scale across JavaScript/Node.js, Python, Go and Rust. Built and operated systems serving multi-million-record workloads, led a zero-downtime migration of 20+ live applications, and shipped AI-integration features (OpenAI + computer vision) end to end. Comfortable operating across every layer of abstraction — from microservices architecture to UI — and a fast learner who has repeatedly ramped into and documented new stacks for teams. Open to fully remote, global work.

CORE COMPETENCIES

JavaScript / Node.js

Full-Stack Engineering

Systems at Scale

Real-Time Data Sync

Microservices & Kafka

AI Integration (OpenAI)

Polyglot (Python, Go, Rust)

End-to-End Ownership

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer — US Remote

- Led end-to-end, **zero-downtime migration of 20+ production applications** from Parse/MongoDB to Firebase/GCP, reporting directly to the CTO
- Built **real-time two-way sync** between MongoDB and Firestore using Node.js and Google Pub/Sub, supporting parallel production traffic throughout the migration
- Shipped a 3D visualization feature (video overlay via ffmpeg) that increased buyer conversion
- Implemented Express Shipping, generating an additional \$40 revenue per order
- Saved \$5,000/month by migrating all services off AWS; migrated storage from S3 to GCS via Python

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer — Singapore Remote

- Built ad-hoc jobs querying **over 2 million Firestore records** to keep customer stock prices current from Morningstar APIs
- Extended backend APIs with Firebase Cloud Functions and Express.js; added responsive React/Tailwind UI to the PWA

Mind2matter.co

Jan 2022 – Jul 2022

Software Engineer — US Remote

- Built backends for DeFi applications using Web3 and Node.js for a US agency with demanding clients
- Delivered React UIs from Figma designs under tight timelines

CodeBits

Jan 2020 – Jul 2021

Software Engineer / Team Lead — Uganda Remote

- Led a team of 4 developers building legal-tech systems for NGOs in Uganda
- Architected a **microservices backend** using Apache Kafka, Docker and Kubernetes; built a USSD service communicating with a Node.js backend via gRPC
- Built a case management system and a cross-platform React Native mobile app with Firebase push notifications

PROJECTS

Healthcare WhatsApp Chatbot (AI Integration)

Integrated OpenAI and Google Vision for prescription OCR over the WhatsApp Business API — an end-to-end AI intake pipeline.

Node.js · OpenAI · Google Vision · WhatsApp Business API

Marketplace Recommendation Engine

Built a collaborative + content-based filtering engine in MongoDB for matching service providers to users.

Node.js · MongoDB

EDUCATION

B.Sc. Computer Engineering — [Makerere University](#)

2018 – 2022

SKILLS

Proficient: JavaScript, Node.js, Firebase, React, GCP, Python, HTML, CSS, Git, Linux, MongoDB, SQL

Intermediate: Go, AWS, Rust, React Native

Systems: Microservices, Apache Kafka, Docker, Kubernetes, gRPC, Pub/Sub, NATS Streaming

Languages: English, Kiswahili
