PROFESSIONAL SUMMARY

Senior Fullstack Engineer with 6+ years building production systems in JavaScript/TypeScript, Node.js, and React across product-focused SaaS platforms. Led an end-to-end, zero-downtime migration of 20+ applications at MTailor (reporting to the CTO), cutting infrastructure cost by ~\$5,000/month. Comfortable owning greenfield, secure and scalable backend systems and customer-facing React frontends end to end. Fintech-adjacent experience keeping data accurate and current against external APIs — the correctness discipline a trust-accounting subsystem demands. Fully remote, EMEA-based with full timezone overlap.

CORE COMPETENCIES

Node.js / TypeScript

React Frontend

Fullstack Development

SaaS / Platform Systems

Scalable & Auditable Backends

Greenfield / MVP Delivery

CI/CD & Containerized Deployment

Distributed Remote Teams

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer — US Remote

- Led the end-to-end, **zero-downtime** migration of 20+ applications from Parse/MongoDB to Firebase/GCP, reporting directly to the CTO.
- Built real-time two-way sync between MongoDB and Firestore using **Node.js** and Google Pub/Sub, keeping production traffic live throughout the migration.
- Built a 3D visualisation feature for customers using video overlay and ffmpeg, increasing buyer conversion.
- Implemented Express Shipping, generating an additional \$40 revenue per order; saved ~\$5,000/month by migrating services off AWS.

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer — Singapore Remote (Fintech)

- Led optimisation of a fintech PWA delivering real-time stock-market prices, building responsive UI pages with **React**, Tailwind, and HTML/CSS.
- Built ad-hoc jobs querying 2M+ Firestore records to keep customer prices accurate and current against Morningstar APIs.
- Extended backend APIs using Firebase Cloud Functions and Express.js (Node.js).

Mind2matter

Jan 2022 – Jul 2022

Software Engineer — US Remote

- Full-stack development for a US agency: built **Node.js** backends for DeFi/Web3 applications.
- Delivered **React** UIs from Figma designs under tight timelines, reporting directly to the CTO.

CodeBits

Jan 2020 – Jul 2021

Software Engineer / Team Lead — Uganda Remote

- Led a team of 4 developers building legal-tech systems for NGOs (FIDA Uganda, LASPNET).
- Architected a **scalable microservices backend** using Apache Kafka, Docker, and Kubernetes, with services communicating over gRPC.
- Built a cross-platform React Native mobile app (iOS & Android) and a USSD service backed by Node.js.

PROJECTS

Real-time MongoDB ↔ Firestore Sync Pipeline

Event-driven two-way sync over Google Pub/Sub enabling a live, zero-downtime migration of 20+ production apps.

Node.js · Google Pub/Sub · Firestore · MongoDB

Real-time Market-Price PWA (Dr Wealth)

Kept 2M+ Firestore records accurate and current against external financial APIs — correctness discipline relevant to ledger/accounting data.

React · Firebase Cloud Functions · Express.js · Node.js

Microservices Legal-Tech Platform (FIDA Uganda)

Architected a resilient, scalable case-management backend for an NGO at production scale.

Apache Kafka · Docker · Kubernetes · gRPC · Node.js

EDUCATION

B.Sc. Computer Engineering — [Makerere University](#)
Kampala, Uganda

2018 – 2022

SKILLS

Proficient: Node.js, TypeScript, JavaScript, React, Firebase, GCP, Python, MongoDB, SQL, Git, Linux

Intermediate: Go, AWS, Rust, React Native **Infrastructure:** Docker, Kubernetes, Apache Kafka, Google Pub/Sub, gRPC

Languages: English, Kiswahili
