PROFESSIONAL SUMMARY

Senior Node.js backend engineer with 5+ years building reliable, distributed services — event-driven sync pipelines, Kafka-based microservices, and idempotent async workflows. Led a zero-downtime migration of 20+ production apps at MTailor with Node.js + Google Pub/Sub at the core: durable handlers, retries, and observability at live-traffic scale. Shipped Express Shipping, a revenue-touching feature (\$40 per order), end-to-end. Strong fit for payments / MarTech systems where correctness, async orchestration, and system reliability are the job.

CORE COMPETENCIES

Node.js · TypeScript

Async Workflows (Pub/Sub, Kafka)

Microservices · gRPC

Distributed Systems

AWS · Docker · K8s

Idempotency & Retries

API Design

Revenue-Touching Features

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer (US Remote) — Backend, Async Systems

- Built durable async workflows for live **MongoDB ↔ Firestore** sync using **Node.js + Google Pub/Sub** — idempotent handlers, retries, and back-pressure.
- Led zero-downtime migration of 20+ production applications, reporting directly to the CTO.
- Shipped **Express Shipping** revenue feature end-to-end — backend logic, API, frontend integration — adding \$40 per order.
- Migrated file storage off **AWS S3** to GCS; saved \$5K/month by moving services off AWS.

MTailor (Contractor)

Mar 2022 – Jul 2022

Contractor — MongoDB → Firestore Migration

- Built a schema-preserving migration pipeline reading MongoDB and writing to Firestore with complex transformation logic.
- Authored SDK documentation for Node.js + Python and trained the Ops team.

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer (Singapore Remote)

- Built scheduled jobs keeping 2M+ records current from external Morningstar APIs — respected quotas, handled backpressure.
- Extended backend APIs with Firebase Cloud Functions and Express.js on TypeScript.

CodeBits

Jan 2020 – Jul 2021

Software Engineer / Team Lead — Legal Tech for NGOs

- Architected event-driven microservices with **Apache Kafka, Docker, Kubernetes**, gRPC for inter-service comms.
- Led a team of 4 developers delivering case management, mobile, and USSD channels.

PROJECTS

Durable Async Workflows — Live MongoDB Sync (MTailor)

Idempotent Pub/Sub consumers + retry-aware handlers supporting parallel production traffic during a 20+ app migration. Temporal-adjacent patterns in Node.js.

Node.js · TypeScript · Pub/Sub · MongoDB · Firestore

Express Shipping Revenue Feature (MTailor)

Shipped a money-touching feature end-to-end: pricing logic, API, frontend. \$40 per order uplift.

Node.js · Firestore · Express.js

Kafka-based Microservices (CodeBits / FIDA Uganda)

Multi-service backend for NGO case management — event-driven, domain-split, gRPC inter-service.

Node.js · Kafka · Docker · Kubernetes · gRPC

EDUCATION

B.Sc. Computer Engineering — Makerere University

Aug 2018 – Sep 2022

SKILLS

Proficient: Node.js, TypeScript, MongoDB, AWS (S3, EC2, EBS), Docker, Kubernetes, GCP (Pub/Sub, Firestore), Git, Linux, Python, SQL

Intermediate: Go, Rust, React, React Native

Patterns: Async / durable workflows, event-driven architecture, idempotency, microservices, API design, CI/CD **Languages:** English · Kiswahili
