PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years building and shipping production software end-to-end: Node.js backends, React.js frontends, and React Native mobile apps. Led the zero-downtime migration of 20+ production applications from Parse/MongoDB to Firebase/GCP, reporting directly to the CTO. Proven in fast-paced, high-iteration agency environments — delivered React UIs from Figma designs under tight timelines for demanding US clients, and shipped revenue features like Express Shipping (+\$40 per order). Deep across every layer: databases (MongoDB, SQL), servers (REST and gRPC APIs, Docker, Kubernetes), and UI. Fully remote, owning delivery with minimal guidance.
