PROFESSIONAL SUMMARY

Infrastructure-focused Software Engineer with 4+ years executing zero-downtime cloud migrations and building scalable distributed systems. Led end-to-end migration of 20+ production applications from Parse/MongoDB to Firebase/GCP, implementing real-time data sync via Pub/Sub and containerized microservices architecture with Docker and Kubernetes. Proven track record in CI/CD pipeline implementation, cloud infrastructure design (AWS, GCP), and cross-functional team enablement. Strong proficiency in TypeScript, Python, and Node.js with intermediate experience in Go. Demonstrated ability to reduce infrastructure costs (\$5K/month savings) while maintaining system reliability during complex migrations.

CORE COMPETENCIES

Cloud Infrastructure (GCP, AWS)

Zero-Downtime Migrations

Docker & Kubernetes

CI/CD Pipelines

Distributed Systems

Real-Time Data Sync (Pub/Sub)

Microservices Architecture

TypeScript & Node.js

WORK EXPERIENCE

MTailor

September 2022 - Present

Software Engineer | US Remote

- Led **end-to-end infrastructure migration** of 20+ applications from Parse/MongoDB to Firebase/GCP with **zero downtime**, reporting directly to CTO
- Designed and implemented **real-time two-way data sync pipeline** between MongoDB and Firestore using Node.js and Google Pub/Sub for message processing
- Executed cloud storage migration from **Amazon S3 to Google Cloud Storage** via custom Python automation scripts
- Reduced infrastructure costs by \$5,000/month** by migrating all services from AWS to GCP with optimized resource allocation
- Built 3D visualization feature using video overlay and ffmpeg library, increasing buyer conversion metrics
- Implemented Express Shipping feature generating additional \$40 revenue per order

MTailor

March 2022 - July 2022

Contractor | US Remote

- Architected **database migration infrastructure** to read data from MongoDB and write to Firestore with complex processing logic
- Created comprehensive **technical documentation and deployment guides** for Firebase SDKs (Node.js, Python)
- Conducted **team enablement training** on Firebase Dashboard operations and backup procedures for Ops team

Dr Wealth

August 2021 - January 2022

Software Engineer | Singapore Remote

- Optimized PWA delivering **real-time stock market data** from Firebase backend
- Built **batch processing jobs querying 2M+ Firestore records** to synchronize customer prices from Morningstar APIs
- Extended backend APIs using **Firebase Cloud Functions and Express.js** deployed on Heroku

CodeBits

January 2020 - July 2021

Software Engineer | Uganda Remote

- Led team of 4 developers building legal tech systems for NGOs using **microservices architecture with Apache Kafka, Docker, and Kubernetes**
- Architected **containerized microservices backend** for FIDA Uganda's case management application
- Built USSD service for legal aid providers with **gRPC communication layer** to Node.js backend
- Developed cross-platform mobile app using React Native and Expo with Firebase push notifications

Mind2matter.co

January 2022 - July 2022

Software Engineer | US Remote

- Built **distributed backends for DeFi applications** using Web3 and Node.js

- Delivered React UIs from Figma designs under tight timelines for demanding clients

EDUCATION

Bachelor of Science in Computer Engineering - [Makerere University](#)

2018 - 2022

Kampala, Uganda

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Go (intermediate), Rust (learning)

Cloud: GCP (Firestore, Cloud Functions, Pub/Sub, GCS), AWS (S3, EC2, EBS) **Infrastructure:** Docker, Kubernetes, Apache Kafka, gRPC

Databases: MongoDB, Firestore, SQL **Frameworks:** Node.js, Express.js, React, React Native **Tools:** Git, Linux, Firebase
