PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 4+ years of experience building production-grade Node.js and React applications for US-based companies. Led the end-to-end migration of 20+ applications from Parse/MongoDB to Firebase/GCP with zero downtime, demonstrating strong ownership and full-stack technical depth. Expertise in designing RESTful APIs, real-time data synchronization pipelines, and event-driven architectures using TypeScript, GraphQL patterns, and cloud services. Experienced with AI coding assistants (Claude, GitHub Copilot) for accelerated development workflows. Proven track record of remote collaboration across timezones, translating product requirements into scalable technical solutions, and delivering measurable business impact.

CORE COMPETENCIES

Node.js / TypeScript	React.js / Frontend	REST & GraphQL APIs	PostgreSQL / MongoDB	Firebase / GCP
Real-time Data Sync	AI Coding Assistants	Remote Collaboration		

WORK EXPERIENCE

MTailor September 2022 – Present

Software Engineer | US Remote

- Led full-stack migration** of 20+ applications from Parse/MongoDB to Firebase/GCP, ensuring zero downtime while reporting directly to the CTO
- Designed and implemented real-time data synchronization pipeline** using Node.js and Google Pub/Sub for two-way MongoDB-Firestore sync with event-driven architecture
- Built 3D visualization feature** for customers using video overlay and ffmpeg library, directly increasing buyer conversion rates
- Delivered Express Shipping feature** end-to-end (pricing logic, checkout UI, fulfillment integration), generating additional \$40 revenue per order
- Reduced infrastructure costs by \$5,000/month** by architecting and executing migration of all services from AWS to GCP
- Migrated WebFlow website from Parse backend to Firebase with modern React frontend patterns

MTailor March 2022 – July 2022

Contractor | US Remote

- Built migration scripts to read data from MongoDB and write to Firestore after complex processing logic
- Wrote comprehensive technical documentation for engineers on Firebase SDKs (Node.js and Python)
- Trained Ops team on new Firebase Dashboard and backup procedures

Mind2matter.co January 2022 – July 2022

Software Engineer | US Remote

- Built full-stack DeFi applications** using Web3, Node.js backend services, and React frontends
- Delivered pixel-perfect React UIs from Figma designs under tight client timelines

Dr Wealth August 2021 – January 2022

Software Engineer | Singapore Remote

- Built and maintained React.js frontend features** for real-time financial data PWA with Firebase backend
- Developed ad-hoc jobs to query 2+ million Firestore records, keeping customer prices current from Morningstar APIs
- Extended backend REST APIs using Firebase Cloud Functions and Express.js

CodeBits January 2020 – July 2021

Software Engineer | Uganda Remote

- Led team of 4 developers** building legal tech systems for NGOs in Uganda (FIDA Uganda, LASPNET Uganda)
- Architected microservices backend** using Apache Kafka, Docker, and Kubernetes for case management application
- Built cross-platform React Native mobile app with Firebase push notifications (iOS & Android)
- Developed USSD service for legal aid providers with Node.js backend via gRPC

EDUCATION

Bachelor of Science in Computer Engineering — [Makerere University](#)
Kampala, Uganda

2018 – 2022

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Go, SQL **Frontend:** React.js, React Native, HTML5, CSS3, Tailwind
Backend: Node.js, Express.js, GraphQL, REST APIs, gRPC **Databases:** PostgreSQL, MongoDB, Firestore, Redis
Cloud: GCP (Pub/Sub, Cloud Functions), AWS (S3, EC2, Lambda), Firebase **DevOps:** Docker, Kubernetes, CI/CD, Git, Linux
AI Tools: Claude, GitHub Copilot, ChatGPT
