

Isaac Mubiru

isaacmubiru99@gmail.com | linkedin.com/in/isaac-mubiru | github.com/zac-09 | Kampala, Uganda (Remote)

PROFESSIONAL SUMMARY

Software Engineer with 4+ years building scalable JavaScript/TypeScript systems and driving product adoption through data-driven development. Led migration of 20+ production applications with zero downtime, directly improving user experience and enabling faster feature velocity. Built frontend features using React and modern frameworks that increased buyer conversion. Experienced with systematic execution toward defined objectives, real-time data pipelines, and cloud infrastructure on GCP/Firebase.

CORE COMPETENCIES

JavaScript / TypeScript

React / Frontend Frameworks

Node.js Backend Systems

Firebase / GCP Cloud

Data-Driven Development

User Flow Optimization

Real-time Data Pipelines

Go (Intermediate)

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer · US Remote

- Built **3D visualization feature** using video overlay and ffmpeg, **increasing buyer conversion** by improving user flow from preview to purchase
- Led end-to-end migration of 20+ applications from Parse/MongoDB to Firebase/GCP with **zero downtime**, enabling faster product development
- Implemented real-time two-way sync between MongoDB and Firestore using Node.js and Google Pub/Sub for live user data consistency
- Implemented Express Shipping feature generating **\$40 additional revenue per order** through systematic product enhancement
- Reduced infrastructure costs by **\$5,000/month** by migrating services from AWS to optimized GCP architecture

MTailor (Contract)

Mar 2022 – Jul 2022

Backend Engineer · US Remote

- Built data migration scripts with complex processing logic, working systematically toward defined migration objectives
- Created technical documentation and trained teams on new Firebase SDKs, enabling broader adoption

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer · Singapore Remote

- Led optimization of PWA delivering real-time stock prices, improving user engagement with live data feeds
- Built data jobs querying **2+ million Firestore records** to analyze user patterns and keep pricing data current
- Developed responsive UI pages using React and Tailwind for improved user flows and engagement
- Extended backend APIs using Firebase Cloud Functions and Express.js

Mind2matter.co

Jan 2022 – Jul 2022

Full-Stack Engineer · US Remote

- Built backends for DeFi applications using Web3 and Node.js under tight delivery timelines
- Delivered React UIs from Figma designs with focus on user experience

CodeBits

Jan 2020 – Jul 2021

Software Engineer · Uganda Remote

- Led team of 4 developers building legal tech systems, demonstrating systematic project execution
- Architected microservices backend using Apache Kafka, Docker, and Kubernetes
- Built cross-platform React Native app with Firebase push notifications for user engagement
- Developed USSD service integrated with Node.js backend via gRPC

PROJECTS

Parse → Firebase Migration (MTailor) Production

Zero-downtime migration of 20+ apps enabling faster feature development. Built real-time MongoDB ↔ Firestore sync using Pub/Sub.

Node.js, Firebase, GCP Pub/Sub, MongoDB, TypeScript

3D Product Visualization (MTailor) User Conversion

Video overlay feature improving buyer conversion by enhancing user preview experience before purchase.

Node.js, ffmpeg, React, Video Processing

Real-Time Stock PWA (Dr Wealth) Production

Optimized PWA for real-time stock prices, handling 2M+ records with Morningstar API integration.

React, Firebase Cloud Functions, Firestore, Tailwind CSS

EDUCATION

B.Sc. Computer Engineering — Makerere University

2018 – 2022

Kampala, Uganda

SKILLS

Languages: JavaScript, TypeScript, Go, Python **Frontend:** React, React Native, Tailwind CSS, Next.js

Backend: Node.js, Express.js, Firebase Cloud Functions **Cloud:** GCP, Firebase, AWS, Pub/Sub **Data:** MongoDB, Firestore, SQL

DevOps: Docker, Kubernetes, Git, Linux
