

Isaac Mubiru

isaacmubiru99@gmail.com | linkedin.com/in/isaac-mubiru | github.com/zac-09 | Kampala, Uganda (EAT, EMEA-friendly)

PROFESSIONAL SUMMARY

Senior TypeScript/Node.js backend engineer with 5+ years delivering scalable services on MongoDB, AWS, Docker, and Kubernetes. Led a zero-downtime migration of 20+ production applications at MTailor, built event-driven two-way MongoDB sync with idempotent Pub/Sub consumers, and architected Kafka-based microservices for NGO legal-tech at CodeBits. Comfortable in squad-based, remote-first teams; Uganda (EAT, UTC+3) overlaps EMEA business hours. Drawn to product-led engineering cultures where senior backends own the full domain — from model to production.

CORE COMPETENCIES

TypeScript · Node.js

MongoDB · SQL

AWS (S3, EC2, EBS)

Kubernetes · Docker

Event-Driven Architecture

Microservices

Zero-Downtime Migrations

Remote Squad Delivery

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer (US Remote) — Backend, Full-cycle Features

- Led end-to-end migration of 20+ production applications off **Parse/MongoDB** to Firebase/GCP with zero downtime, reporting to the CTO.
- Designed event-driven two-way **MongoDB ↔ Firestore** sync on **Node.js + Google Pub/Sub** with idempotent consumers and retries.
- Shipped Express Shipping domain service end-to-end (\$40 additional revenue per order) — from model to API to frontend.
- Migrated file storage from **AWS S3** to GCS; saved \$5K/month by migrating services off AWS.

MTailor (Contractor)

Mar 2022 – Jul 2022

Contractor — MongoDB → Firestore Migration

- Built a schema-preserving migration pipeline reading **MongoDB** and writing to Firestore with complex transformation logic.
- Authored Firebase SDK documentation and trained the Ops team on the new stack.

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer (Singapore Remote)

- Built ad-hoc jobs querying over 2 million records to keep customer prices current from Morningstar APIs.
- Extended backend APIs with Firebase Cloud Functions and Express.js on **TypeScript**.

CodeBits

Jan 2020 – Jul 2021

Software Engineer / Team Lead — Legal Tech for NGOs

- Led a team of 4 developers; architected event-driven microservices using **Apache Kafka, Docker, Kubernetes**.
- Built case management for FIDA Uganda and a paralegal database for LASPNET with gRPC service-to-service communication.

PROJECTS

Real-time MongoDB Sync Pipeline (MTailor)

Event-driven two-way sync supporting parallel production traffic during a 20+ app migration. Idempotent Pub/Sub consumers, schema translation.
Node.js · TypeScript · MongoDB · Pub/Sub · Firestore

FIDA Uganda Case Management — Kafka Microservices

Architected a multi-service backend for NGO case management. Domain-driven split across case intake, paralegal database, mobile, USSD.
Node.js · Kafka · Docker · Kubernetes · gRPC

Express Shipping Domain Service (MTailor)

Shipped a new domain service adding \$40 per order in revenue — end-to-end from pricing logic to API to UI.
Node.js · TypeScript · Firestore

EDUCATION

B.Sc. Computer Engineering — Makerere University

Aug 2018 – Sep 2022

SKILLS

Proficient: TypeScript, Node.js, MongoDB, AWS (S3, EC2, EBS), Docker, Kubernetes, Git, SQL, Firebase, GCP, Python, React, Linux

Intermediate: Go, PostgreSQL, Rust, React Native

Patterns: Event-driven / CQRS-adjacent, domain-driven design, microservices, zero-downtime migrations, squad delivery

Languages: English · Kiswahili
