PROFESSIONAL SUMMARY

Senior full-stack TypeScript engineer with 6+ years building user-facing, AI-powered, and serverless systems end-to-end. Led the zero-downtime migration of 20+ production apps at MTailor, designing Pub/Sub-based backends and React UIs that real users rely on. Built a WhatsApp healthcare chatbot integrating OpenAI and Google Vision — shipping LLMs into production workflows. At Dr Wealth, built Firebase Cloud Functions and queried 2M+ records for a real-time PWA. Comfort with Node.js, React, serverless runtimes, and distributed architecture in fast-paced startup environments.

CORE COMPETENCIES

Full-stack TypeScript

Node.js + React

Serverless functions

LLM integration

Distributed systems

Performance optimization

Databases at scale

Authentication / security

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer — US Remote

- Led end-to-end migration of 20+ production applications from Parse/MongoDB to Firebase/GCP with zero downtime, reporting directly to the CTO.
- Shipped user-facing 3D visualization feature using ffmpeg video overlay — increased buyer conversion.
- Built real-time two-way MongoDB ↔ Firestore sync with Node.js + Google Pub/Sub — idempotent serverless dual-write over live traffic.
- Implemented Express Shipping flow, generating additional \$40 revenue per order.
- Cut \$5,000/month by migrating services off AWS to GCP.

Mind2matter.co

Jan 2022 – Jul 2022

Software Engineer — US Remote (Agency, reporting to CTO)

- Built DeFi backends with Web3.js + Node.js — EVM-compatible integration from smart contract ABIs to React clients.
- Delivered React UIs from Figma under tight agency deadlines.

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer — Singapore Remote

- Built ad-hoc jobs querying 2M+ Firestore records — performance-optimized for a real-time PWA.
- Extended backend APIs with Firebase Cloud Functions (serverless) + Express.js on Heroku.
- Shipped responsive React + Tailwind UI pages.

CodeBits

Jan 2020 – Jul 2021

Software Engineer — Uganda Remote (Led team of 4)

- Architected a Node.js microservices backend (Kafka + gRPC + NATS Streaming + Docker + Kubernetes) — distributed system consumed by mobile, web, and USSD clients.
- Built React Native + Expo mobile app with Firebase push notifications.

MTailor (Contractor)

Mar 2022 – Jul 2022

Contractor — US Remote

- Complex Parse → Firebase migration; authored docs and training for the engineering team and Ops.

PROJECTS

Healthcare WhatsApp Chatbot — LLM + Vision

End-to-end integration of OpenAI and Google Vision for prescription OCR over the WhatsApp Business API — LLM in a real user workflow.

Node.js · OpenAI · Google Vision · WhatsApp Business API

Parse → Firebase Migration (MTailor)

Pub/Sub-based sync pipeline migrating 20+ apps with zero downtime; cut \$5K/month.

Node.js · Google Pub/Sub · Firestore · MongoDB · GCP

DeFi Backend Integrations (Mind2matter)

Web3.js + Node.js integration layer bridging smart contracts to React UIs.

Node.js · Web3.js · EVM · React

EDUCATION

B.Sc. Computer Engineering · [Makerere University](#)

Aug 2018 – Sep 2022

SKILLS

Proficient: Node.js, TypeScript, React, Firebase, GCP, Python, MongoDB, SQL, Git, Linux

Intermediate: Go, AWS, Rust, React Native, Kubernetes, Kafka, OpenAI API, Web3.js

Languages: English · Kiswahili
