PROFESSIONAL SUMMARY

Senior full-stack engineer with 5+ years shipping end-to-end features on Node.js/TypeScript backends and React frontends. At MTailor, delivered a 3D visualisation feature (video overlay + ffmpeg) that lifted buyer conversion, and shipped Express Shipping (\$40 per order) from backend logic to UI. At Mind2matter, built full-stack DeFi applications with Web3 + Node.js + React/Tailwind against tight deadlines. Comfortable owning architectural decisions and running code review — led a team of 4 at CodeBits on a Kafka-based microservices platform. Uganda (EAT, UTC+3) overlaps CET business hours.
