PROFESSIONAL SUMMARY

Senior full-stack engineer with 5+ years shipping production Node.js / TypeScript and React / Tailwind. I led a zero-downtime migration of 20+ live applications at MTailor (US Remote), reporting to the CTO, and built event-driven backends with Apache Kafka and gRPC. Strengths in debugging intricate distributed and real-time systems, code review, and mentoring — the same work the Cal.com Foundation team does to keep the ship moving. Comfortable owning high-risk changes end-to-end across the stack.
