isaacmubiru99@gmail.com | linkedin.com/in/isaac-mubiru-3bb728174 | github.com/zac-09 | Kampala, Uganda (UTC+3) — Remote

PROFESSIONAL SUMMARY

Senior full-stack engineer (React, TypeScript, Node.js) who ships features measured in conversion and revenue: built a customer-facing 3D visualization experience that increased buyer conversion and an Express Shipping flow generating an additional \$40 revenue per order. Led the zero-downtime migration of 20+ production applications, owning tracking-critical data pipelines end-to-end. Built AI into user-facing products — an OpenAI + Google Vision chatbot on the WhatsApp Business API — and use AI tooling daily to multiply output. Public work at github.com/zac-09. Fully remote and async across US, Singapore, and East Africa time zones since 2020. Now applying the same ship-measure-iterate approach to growth engineering at Buffer.

CORE COMPETENCIES

React & TypeScript

Node.js Backend & API Routes

Conversion-Driven Features

Third-Party API Integrations

Event & Tracking Pipelines (Pub/Sub)

AI-Powered User-Facing Features

End-to-End Project Ownership

Remote & Async Collaboration

WORK EXPERIENCE

MTailor

Sep 2022 – Present

Software Engineer — US Remote

- Built a customer-facing **3D visualization feature** using video overlay and ffmpeg, **increasing buyer conversion** on the purchase flow
- Implemented **Express Shipping** end-to-end (backend logic, pricing, checkout integration), generating an additional **\$40 revenue per order**
- Led the end-to-end migration of **20+ applications** from Parse/MongoDB to Firebase/GCP with **zero downtime**, reporting directly to the CTO
- Built a real-time two-way sync between MongoDB and Firestore using Node.js and Google Pub/Sub — tracking-critical data accuracy while both systems served live traffic
- Migrated a Webflow marketing website from a Parse backend to Firebase
- Saved the company **\$5,000/month** by consolidating all services off AWS

MTailor

Mar 2022 – Jul 2022

Contractor (Backend Migration) — US Remote

- Built migration scripts reading from MongoDB and writing to Firestore after complex processing logic
- Wrote documentation for fellow engineers on the new Firebase SDKs (Node.js and Python) and trained the Ops team on new dashboards and backup procedures

Dr Wealth

Aug 2021 – Jan 2022

Software Engineer — Singapore Remote

- Kept real-time stock prices accurate for customers by building ad-hoc data jobs over **2M+ Firestore records** fed from Morningstar APIs — data-pipeline correctness at scale
- Shipped responsive UI pages for a customer-facing PWA using React, Tailwind, and HTML/CSS
- Extended backend APIs using Firebase Cloud Functions and Express.js

Mind2matter

Jan 2022 – Jul 2022

Software Engineer (Full-Stack) — US Remote

- Delivered pixel-accurate React UIs from Figma designs under tight agency timelines
- Built backends for DeFi applications using Web3 and Node.js

CodeBits

Jan 2020 – Jul 2021

Software Engineer (Team Lead) — Uganda Remote

- Led a team of 4 developers building legal tech systems for NGOs in Uganda
- Built a cross-platform mobile app with React Native and Expo, with Firebase push notifications
- Architected a microservices backend using Apache Kafka, Docker, and Kubernetes

PROJECTS

Healthcare WhatsApp Chatbot — AI in a user-facing product

Integrated OpenAI and Google Vision for prescription OCR via the WhatsApp Business API — shipping AI where users already are.

Node.js, OpenAI API, Google Vision, WhatsApp Business API

Marketplace Recommendation Engine

Built collaborative and content-based filtering in MongoDB to match customers with service providers — relevance logic that drives engagement.

Node.js, MongoDB

Real-Time Pub/Sub Sync Pipeline

Live MongoDB ↔ Firestore sync supporting parallel production traffic during migration — the same correctness discipline attribution and tracking rebuilds demand.

Node.js, Google Pub/Sub, Firestore, MongoDB

EDUCATION

BSc Computer Engineering — Makerere University

2018 – 2022

Kampala, Uganda

SKILLS

Proficient: Node.js, React, TypeScript/JavaScript, Firebase, GCP, Python, MongoDB, SQL, HTML, CSS, Git, Linux

Intermediate: Go, AWS, Rust, React Native **Languages:** English, Kiswahili
